Table Notes:

Data for 2005 has been reclassified into categories used under the PPC permitting of landfills and because of the ban on the co-disposal of waste in landfills in July 2004

From 16 July 2004, hazardous landfills have only been able to accept wastes classified as hazardous under the Hazardous Waste Directive.

Some non-hazardous sites can accept some Stable Non Reactive Hazardous Wastes (SNRHW) into a dedicated cell, but this is usually a small part of the overall capacity of the site

Due to the limitations of our data we are unable to compile reliable estimates of capacity for treatment and transfer facilities. 2005 landfill capacity data was obtained by a separate survey carried out in 2006.
